

ATTENTION: ORGANIC KIWIFRUIT HANDLERS!

REPORTING ORGANIC!

If you handle certified organic California kiwifruit, you must report all of your organic kiwifruit separately from conventional (non-organic). If all you handle is certified organic, then you just have to provide one set of monthly and year end reports. But if you handle both organic and non-organic, you will need to provide reports for each type. Transitional organic fruit should be reported as conventional (non-organic).

If you have any questions please contact Chris Zanobini at the KAC office, at (916) 441-0678
